Engineered TO LEAD

A History of Service, Support Landfill Solutions

At GunnCo, we take pride in the pre-engineered and custom systems we manufacture. But, we know that our solid reputation was really built by providing decades of high-level service, consulting, and support to our customers.

GunnCo is your go-to solution for the life cycle of your landfill - whether you need expertise for the launch of a landfill, emergency repair or replacement for existing leachate systems, consultation, or help with shut down operations.

- ▶ Trained Technicians provide field preventive maintenance including preventive and emergency repairs for operating and closed sites.
- ▶ Technical assistance supplied for the life of your system.
- ▶ Extensive inventory of critical replacement parts, including pumps, motors, power cables, transducers, and electrical control components.

SideSloper® Pumps Lead The Way

Sidesloper® leachate pumps have been providing unmatched reliability of landfill performance despite the challenge common with this unique and demanding application.

- ▶ GunnCo Engineered systems are available from as little as 5 gpm to over 1000 gpm and can be provided with design features to meet specific applications.
- ▶ Designed for use in 18" to 24" HDPE riser pipes. Custom pumps can be provided to meet smaller or larger riser pipes.
- ▶ Full length screens are available for vertical applications with high debris, such as condensate wells. Cooling shrouds are available for applications that require motor cooling.

"I HAVE BEEN A GUNNCO CUSTOMER FOR 12 YEARS. I HAVE FOUND THIS COMPANY TO BE THE MOST PROFESSIONAL COMPANY FOR ALL OF MY LEACHATE MANAGEMENT NEEDS.."
--REGIONAL ENGINEER
