

Vertical Lift Station Applications

Illustrate as simplex system with - float level sensors and top cable junction boxes

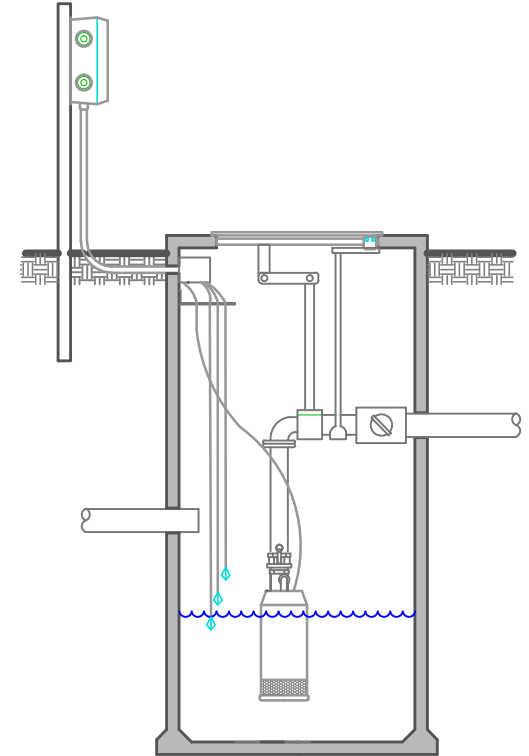

Guide Rail

Typically used in waste water applications w/ large solids
separate valve box recommended

Pump w/ Stand

Typically used in condensate and leachate transfer applications. Stand places pump inlet above sediment. Disconnect methods allow easy access without entering wet well

Suspended Pump w/ Pitless Adapter

Typically used in condensate and leachate transfer applications. Pitless adapter supports pump and allows access without entering well.
